## What's New

09th April 2026

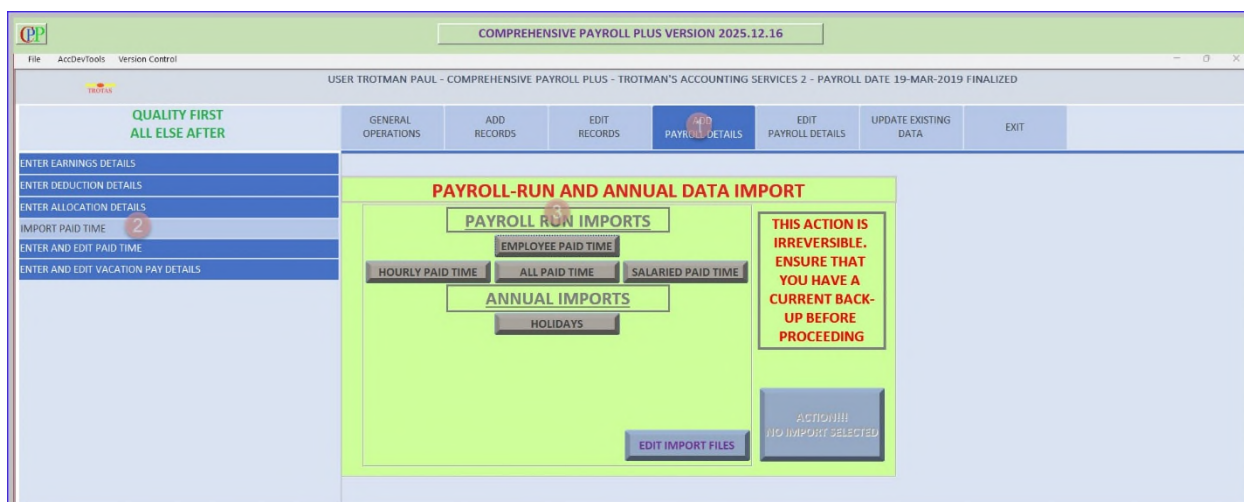

### Enhancements

#### User Interface Improvements

UI now runs in full-screen mode, taking advantage of the available monitor space.

#### Operator can now perform limited imports

Periodic imports menu item is now added to the operator's dashboard. This allows operators to perform the complete payroll run process.

### Fixes

#### Startup error fixed

Remedied a startup error related to maintenance mode. Restructured the maintenance mode check and initiated check at a later stage of the startup process.

#### Back-end upgrade error fixed

Back-end upgrade 2026.02.06 was producing an error related to the order in which the procedures were executed. The order in which the upgrade procedures run was changed.

#### Employees were omitted from service charge list under certain circumstances

Modified the source object to include all eligible employees.

Employees were omitted from departmental tips under certain circumstances

Modified the source object to include all eligible employees.

### Forms Display Issues Fixed

Some forms were not displaying properly on monitors where the resolution was different to the development machine. The issue was addressed in the following forms.

1. Back-end selection
2. Start New Payroll
3. Reports Dashboard
4. Payroll items pay category accounts map
5. Payroll items accounts map edits.
